Q: How to host a Spring Boot Websocket endpoint in a local IIS webserver? I am trying to host a Spring Boot Websocket endpoint in a local IIS webserver. I have an application, which is in a spring-boot app, and i have a spring-websocket endpoint, which i want to host as a local websocket. This is what i have so far: web.xml websocket org.springframework.web.socket.server.standard.StandardWebsocketServlet 1 /chat/* org.springframework.web.socket.server.standard.StandardWebsocketConfigurer A: I am using microsoft azurewebsites for this project. I have just created a website, in which i have created 2 web projects: 1.) web 82157476af
